Sims 3 household limit cheat

Author Theme: More Than 8 in the Family? (Read 12061 times) highlighted by The Sims (TM) 3 zgt; General Discussion of the Details of the Details How to Have More Than 8 Sims? I just got this crazy idea to build a giant house and put every sim in sunset valley to live in it, but I need more than 8 Sims to make it possible. If you have any guide, please post'em. Youtube videos can help as well. I have a lot of mods, but no extensions. Note: This is only to be used to report spam, advertising and problematic (harassment, wrestling, or rude) messages. (Image credit: EA) There's nothing wrong with a few reads of The Sims 3. Cash codes, free real estate and more are all decent requests in the game you can play as long as and in different ways like this. With the right Sims 3 cheats you can do a lot more too: make people happy, age sims and all sorts of extras. They are more of a game modifier than anything else. Before you can enjoy the world of limitless Simoleans and amazing houses, you'll have to include Sims 3 cheats in your game, which we'll get to in a minute. It's also worth giving a small security warning here. It's very unlikely you'll destroy anything with a cheat code, but you'll influence things in strange and interesting ways, so maybe don't throw codes around with your favorite save or sim. With that in mind, read on for our full guide to all the best The Sims 3 cheats and how to use them. The Sims 3 Codes (Image: EA)To get started with The Sims 3 cheats you need to click Control-Shift-C to open the command box, which will then allow you to enter cheat codes for the desired effect you want to achieve. The main cheat code you want is testingcheatsenable true, as it allows you to click on different elements in the world and edit their properties. You can jump-click on your character to edit features and status, Shift-Click to place to teleport, Shift-Click to other sims for friendship editing, Shift-Click to your inbox to change your career, and more. Other Sims 3 cheats are: help - Displaying the most cheatskaching - 1000 Simoleons rosebud - 1000 Simoleons motherlode - 50,000 Simoleons familyfunds (sims surname) money wanted - most money is possible 9999999. This saves you from constantly entering the motherlode to cheat a few timeshazaam - 2,500 pounds of life happiness indicates an active sim change traits - set or clear traits make happy - sets all mood/moodlets for everyone in the house to perfect, Removes negative moodlets make motfs static dynamic - Set motfs static or dynamic for the entire household (Image credit: EA)set age (number) - Set age Sim On - Age up sim to the irrepressible NPC who lives in your family, Works on kids forcewins - type after clicking on a pregnant Sim edit in cas - Take the sim back to create-a-sim make me know everyone - Favorite Sim knows that any other Sim make friends for me - Make a few random friends for the selected Sim resetsimsimsim Family - Return Sims to a safe and neutral state on homefreerealestate - Ignore the cost when buying a lot of buydebug - Allows you to buy anything, including blocked objects add to the household - Add active Sim current household service sim -- Make specific sim services appear to force a visitor - Neighbor's force - Give the chosen Sim a career potential opportunity - Click on the career you're working on to force event empowering - Click on the career building that you're working on to force an event to force all events - Click on a career building to show all the events for a career consistently unlockoutfits (include) - Viewing career outfits and service forms. This code should be enabled before entering Create-A-Sim mode (Image credit: EA) moveobjects (included) - No restrictions for placing/moving objects limiting inflections (admittedly) - Power relief adjustments regardless of objects, sims, and other structures disablesnappingtoslotsonalt (inc.) - Objects will not snap to slots, Holding Alt fadeobjects (inc.) - Objects disappear when the camera gets closer to them snapobjectstoangle (admittedly) - Switch 45 degrees angular object snapobjectstogrid (admittedly) - switch snapobjectstogrid (admitted) - Show or hide conversation/thought balls over the head of Sim'smotion 0 is normal, 8 is the slowest fps (included) - Switch framerate display in the top right full screen mode (on) - Switch full screen to go out - Get out of the gamejokeplease - Print random jokes for the console enablellamas (included) - Llamas included a message To access the Sims 3 Command console, press management you have to see the box appear in the top left of the screen - that is, where you enter the codes. If you use Windows Vista and for some reason the console won't come up, click control, Windows and shift button along with 'C'. When you're done cheating, press the escape key to close the console. The Sims 3 Cheats CheatWhat he does testingcheatsenable trueEnables testing cheats (such as shift click mailbox) kaching or rosebudGives family \$1000 Simoleons familyfunds lastname sum Best Money cheat. Gives the specified amount of money for a family with this surname resetsim surname And this deception to correct the sim, which can not move hideheadlineeffects onHides plumbob and any speech bubbles. Good for screenshots. BuydebugLets you buy anything, including blocked objects such as Pangu's Axe (World Adventures) Moveobjects on/OffAllows you place objects anywhere. See many more building cheats below. AgeuptoNPC onAges up to Sim in an unmanageable NPC that lives in your family. over the children. jokepleaseGives you random joke Sims 3 Testing codes How to use testing codes: As stated above, you have to enter the console command testingcheatsenable true. This will allow you to click the shift and click different locations and items to bring up special commands. I'll re-examine of them are here. You can use them as cheating skills. Click here to find out how you can use testingcheats to improve your skills in The Sims 3. Ground-Clicking Testing Cheats How TeleportThis cheat will really take some time on the road from your character commut Shift-click any open plot of land with test cheats included, and your character can instantly teleport, star trek style, to this location. Use it to collect to get to your favorite fishing spot, or any number of other ways. Be creative! With World Adventures you can zip in and out without cheating, though not as fast, with the help of the Zesenport and Tranquil transmission. This cheat can also be used to access areas that you can't walk. Change other lots - Build or buy mode outside of HouseholdShift-clicking on the ground on a lot you don't own will allow you to make changes to the buildings and add features such as additional skill objects or amenities that you would like to use during the visit. Using this cheat uses your own family's funds to buy/build, so you invest in that much to either improve it, or taking some things away and raising your family's funds. Mailbox-Click Testing Codes for Advanced Control activate the following commands by shifting clicking on the mailbox. You will be presented with a menu with the following extended Readers. Cheating to make friends in The Sims 3: Make your sim Know Everyone Yep, you can go click on the magic mailbox so that your character knows all the other characters in the city you're playing. Understand that it should add all the townspeople to the list of known sims, so it may take some time for the hype to finish processing. Make All Happy Activating This Cheat makes all active home sims happy by filling their needs instantly. This is a one-time boost unlike Make Needs Static, below. This, however, does not affect guests at parties or other NPCs by a lot - meaning that Sims who have been affected by ageuptonpc will not be affected either. Thanks to Neveryon for confirming how it works - I initially thought it would affect everything a lot. Make All Happy is Unlimited Needs Cheat: Make Needs Static When you use this, your character's needs will be blocked. Your character's bar needs to be filled and they will never diminish until it is turned on. To disable this, go back to the mailbox and click to make the needs dynamic. Make Me Friends CheatClicking this throws you some random friends. Again, not so important, but it can be useful as a hoax if you want to raise your charisma by reading or using a mirror, but do not want to meet the demands of a friend it will also help with Super Popular Life Desire and Charisma Challenges. Career Promotion CheatYou can change the current work of your character and even give them promotion to the highest level in this track career. Check out the various special abilities your character earns to reach the top spot. See a career guide to get information about the benefits your characters receive to the top of every career ladder. Chat to change the look of your character: Edit in Create-A-SimYou can now edit Sim in create-a-sim with test chats enabled. This allows you to completely revamp the Sim, and as such is quite powerful to customize the Towie or change the sim you've created. Spawning Jobs and Jobs EventsYou can cause career events by pushing job changes. If your character has one of the new professions with ambitions, you can jump-click on the inhabited lot to generate jobs. It works for jobs like firefighter. The types of jobs available for caviar are limited by your level in the profession, of course. It's a good way to deceive and fill those life desires. It also works to work a rabbit hole if you hit the relevant public parties. Clicking on your character with Testingcheats Change Features: Clicking this will bring up a list of traits for your character. You can clean them all up and in a mid-life crisis without paying all those life rewards points. This is very cool if you have a super sim you want to be able to try different traits with. Great for experimentation. Age Up Cheat: Trigger Age TransitionThis can make a sim age to the next life cycle that follows this pattern: Child, Toddler, Child, Toddler, Child, Teen, Young Adult, Adult, Elder. You can't go back. The only way to bring down Age Sims is to use Young Adult, a lifetime reward or a chemical potion from The Sims 3 Generations. Otherwise, the closest you can come to rescuing an older Sim is to feed them ambrosia or disable aging (see above). Cheating to force the sim to move InIf you shift-click sim, which is not in your home with testing cheats, you can take control of them and immediately join them to join your family. Use this for tricky reasons, or to avoid editing families. It's a quick and seamless way to add to your family. By clicking on the events and features of Work SiteForce, if you click on your character's work site, you can make events happen. They range from work to work. What you run is one of the random events that can happen while the character is at work. In addition, job creation can be initiated in this way. Use it to help your character get promotions faster, forcing opportunities that help them move forward. Unfortunately, I do not know how to force skill and special events. Unfortunately, there is no way to cheat to get a chance to grow an omni plant, you will have to work on it a bit! Non-Shift Click Testing Cheats Remove Moodletif you keep in check while testing cheats are included, you can remove nasty moods. You can, in fact, remove any moodlet with this cheat. You can use it, Remove the fatigue moodlet after working out, so that the character can return to the treadmill, or remove the frightened moodlet that appears when your character has been banished from the catacombs of the zombie bear! Max Motives of the character With testingcheats included, you can click on the bar of the character's needs to raise or lower them. Drag the bar and it has to fill or deplete. It can be ultra-comfortable ultra-comfortable Parents of triplets are trying to get all three pot trained! It's also good if you really need your sim in the best shape to complete the opportunity, but they are hungry, or tired and won't cook dishes that need to be delivered the next day. Its applications are many, and can be considered an easy version of make needs static cheat. Make friends (or enemies) through CheatingIf you go to the relationship panel with these cheats included, you will also be able to drag relationship bars. You can make someone a best friend or even a sworn enemy in this way. To make them a love interest, drag them to the bar in full, invite them over then your character to start a romantic interaction. Cheat for Infinite Life Awards (Lifetime Happiness Points)Make your character and get them into your home. Save the game as soon as they're moved in and then head back to the main menu. Before you download the saved Sims 3 game, open the cheat console (Control and Shift) and test for tosenabled true. Once you download your Sims game, testing cheats will still be on. This will allow you to go to the life rewards tab and then control the click in the area around the treasure chest icon. The game should not be allowed to do so, or it may seem that doesn't work. Each click will give your character an additional 500 happiness points for life. Click away, you have endless reward points to spend! Get out and snag that food replicator. Free batches with testing cheats included, you can do a lot for free to let one character buy a lot that is over their budget. Just bring in the freerealestate console team and all lots will be free. This is a decent time saver if you want to buy the biggest lot from the start and then skip out on money cheats later. If you need or want to disable Sims 3 cheat testing for some reason, you'll be false. If you find any other objects that can be squeezed with this cheat, or find a way to trigger skills opportunities by cheating, be sure to let me know! Do this by joining our forum Other types of cheats and secrets to make Sims Live Forever by disabling aging It's not really a cheat, but many may not notice that it is present in the game, so I felt that it should be listed here. Go to the options menu and head to the game options tab at the top of the window. Here you can shift the life expectancy of Sims to the right to make their lives last 900 days. Also, if you can't turn on the aging window, you'll turn off aging, your characters won't age anymore. Be careful, it's not immortality in the main sense. You can still die from fire or electric shock. To prevent this, be sure to install a smoke detector in your character's home and if you are shocked during Repair or upgrade the facility does not return to work for a while because a second shock can kill your character. Preventing death with flower deathIf your character has a flower of death in their inventory when they die, they will give it to the grim reaper in exchange for them Usually you can find a flower of death in the cemetery at the beginning. Harvest the plant and keep it on your sim. If they die from fire, drowning or any other preventable way, your character will hand over a flower and live on. Read on gardening to learn how to grow on your own. Secret: Choosing a baby's gender While only world-renowned surgeons can really determine the sex of your children, you can improve the chances your character will have the sex of the baby you are looking for. You can increase the chances of having a man by having a pregnant Sim eat apples, or increase the chances for a girl by eating a watermelon. This is a tried and true method of choosing gender. Please note that this happens after the character is already pregnant. So if you really want your character to have a boy or a girl, head to the supermarket and get them to eat the products of choice. Increase the chance of having twins or TripletsSee some want to have twins, and not aware of this, I'll write a bit about it. To increase the chances of having twins or triplets before your Sims Woohoo for baby, take a fertility treatment reward for a lifetime for one or both. One sim with this will work sometimes, but if both have treatment, you are almost guaranteed multiple babies. The secret is that the parent listens to children's music on the radio and watched children's programs on TV. Doing both at once a lot during pregnancy will really boost mom's multiple chances! Sims 3 Expansion Pack Cheats World Adventure Tomb Building CheatsWhile teleportation that makes needs always green, and giving your Sims cash nice while traveling. Sims 3's World Of Adventure Expansion patch has added one new cheat to the game. To use it, first turn on God mode by entering testingcheatsenable faithfully followed bydebug. This cheat allows your character to purchase all new items in the expansion package and allows you to participate in Tomb Building. This can be useful for fixing broken traders in new destinations markets. If there is no supplier, you can turn on this mode, remove your cash register and place another similar view in its place. Buying Pangu's Axe and other unique items can also be useful for people who don't mind cheating their way through. Edit lots in foreign lands (WAT)Type EnableLotLocking on. When you click a lot in a travel location that you want to edit, there will now be a lock that you can turn/off to build there. Cheat for Ambition Profession ExperienceeS can push and drag the ambitions of the profession experience bars with testingcheatsenable true. It doesn't work for a regular career. Rather, you'd shift-click to your inbox and choose a career track/specific job to get promoted quickly. This cheat is useful for professions when your character has already exhausted the basic skills associated with this profession. The Sims 3 Late Night You have buydebug on, you can access skyscraper shells. Putting restrictbuildbyinbuildings off will allow you to make changes these and customize your apartments and other aspects of the building. Sims 3 Late night cheats for Club EntryWith testing cheats included, if you shift-click barrier in the club late at night, you can change the entry requirements such as star level, amount of bribes, etc. This hoax can help your character get into the lounges and nightclubs that they might not be without any actual work. The Sims 3 Seasons: Weather CheatsSimmers, who have The Sims 3 Seasons, can use a new type of deception - weather control To do this, use testingcheatsenable true and click on any piece of land. There will be a cheat menu where you can access the Seasons interface, which allows you to control the current seasons, weather, wind and temperature of the world. Please note that you can turn off certain seasons, change the duration of the seasons, and the types of weather that can occur through the Sims 3 options menu. The Sims 3 Island Paradise: Unlock Uncharted Islands Cheaff you want to cheat to avoid all the different tasks you need to do in order to unlock all the islands in The Sims 3 Island Paradise, the first type of testingcheatsenable truth, and then use DiscoverAllUnchartedIslands Cheat, which instantly remove the fog from all the islands and allow you to build a resort there. If you want to do this in an honest way and have trouble collecting bottles with card parts, read Search for map fragments and follow other guides to Paradise Island to see the means of unlocking other Uncharted islands. Building Codes - More build mode options These cheats are in a separate section because they are mostly useful for builders. Moveobjects on cheat can help you at a time when you need to move something and the game won't let you. These cheat codes will allow you to change your character's home or a lot, making it more unique. In creative hands, they can be powerful tools. Moveobjects On/OffType this cheat in the console to allow yourself to place items anywhere. You can do stupid things with this, or use it to your advantage to help you decorate your character's house. With it there will be no restrictions where you can place certain items like cars. To disable the cheat, the type of moveobjects from RestrictBuildBuyinBuildings OffOn Use is if you get an error message that the Homeowners Association will not allow construction. The code should be entered after testing cheatsenable true. This removes the restriction and allows you to make changes to such lots. AlwaysAllowBuildBuy On/OffThis does not allow you to ever be restricted in construction or purchase due to events such as house fire or burglary. ConstrainFloorElevation FalseTrueThis cheat turns off height restrictions. With the restrictions off, you can change the height of the walls and terrain as high as you want. PlaceFreezes On/Offallows you should place on top of the tiled floors. disableSnappingToSlotson Alt On/OffThis stops objects from being tied to the slot when placed. Keep Alt When Placing ObjectstIs Not Necessary but mine to be unknown to some Simmers. Holding Alt when placing an object will allow you to rotate it freely, offering more accommodation options. Further reading: Gameplay Tips, Secrets and Useful Information Our Sims 3 website has many other useful articles related to cheating and game secrets.
